Cloud Storage

All of your recordings can be stored in our cloud solution where you can build an archive.

UltraHD 4K Quality

Our IP cameras have 4K Ultra-High Definition quality with a framerate up to 60 fps.

Downloadable Recordings

Download the full recording and export it to other applications and platforms.

→ VIDEO STREAMING

◆ 1. Camera Recording

- Fully-featured built-in video archive
- Unlimited depth of video archive

◆ 2. Overlays

Providing additional visual information or graphics overlaid on the video content, such as scoreboards, graphics, or text, enhancing the viewer's experience.

◆ 3. Many platforms (Youtube, Twitch, Tiktok, FaceBook etc)

Serve as diverse and accessible channels for video streaming, enabling content creators to reach broad and varied audiences with their live or recorded video content.

◆ 4. Scheduler

User can define recording times, when the system automatically records video from all cameras.

◆ 5. Realtime tagging

Realtime Tagging the match or training session in order to complete your analysis directly after the event.

◆ 6. Online chat

Facilitates real-time communication among viewers, allowing them to share thoughts, reactions, and engage in discussions, creating a sense of community and interactivity during live broadcasts.

VIDEO STREAMING

◆ 7. Integration

We build integrations with video analysis software solutions in order to stream the live video to these applications. The livestream can be delivered in RTSP and RTMP streaming formats. With this option you can real time capture the video directly into your software suite.

◆ 8. Virtual background

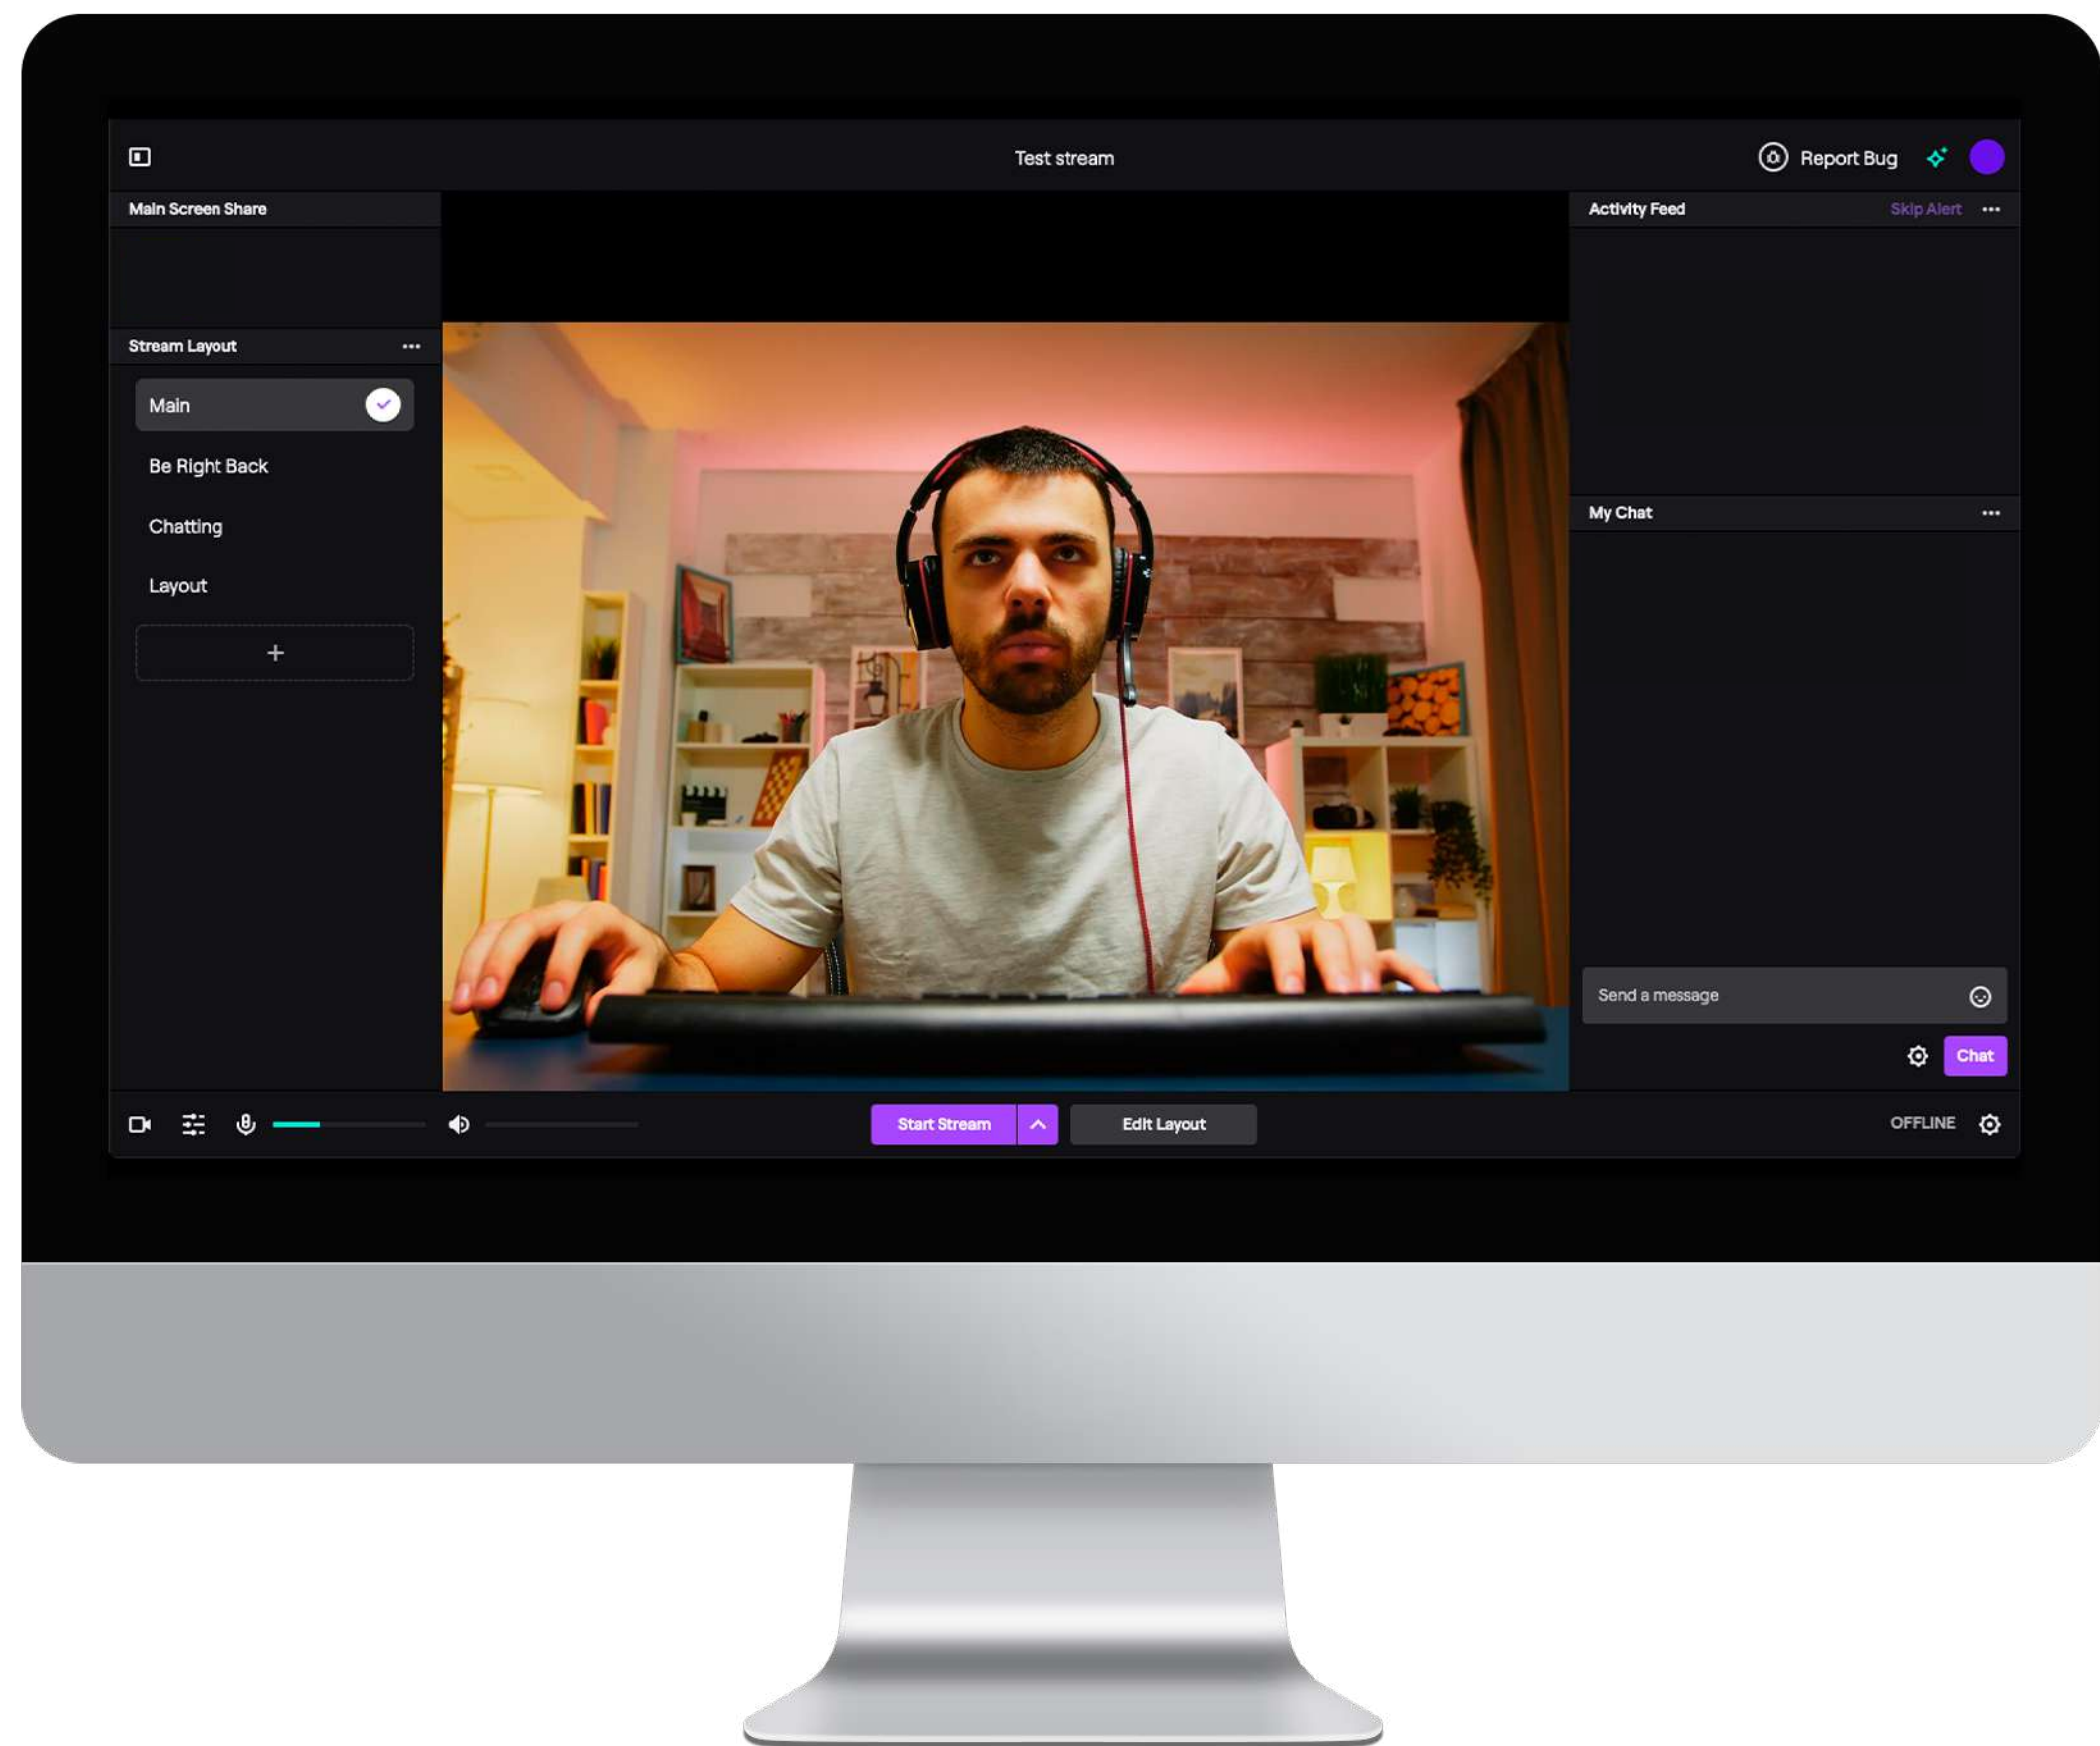

This feature is especially useful for maintaining privacy, minimizing distractions, and creating a consistent and visually appealing environment during virtual meetings, presentations, or live broadcasts.

◆ 9. Betting

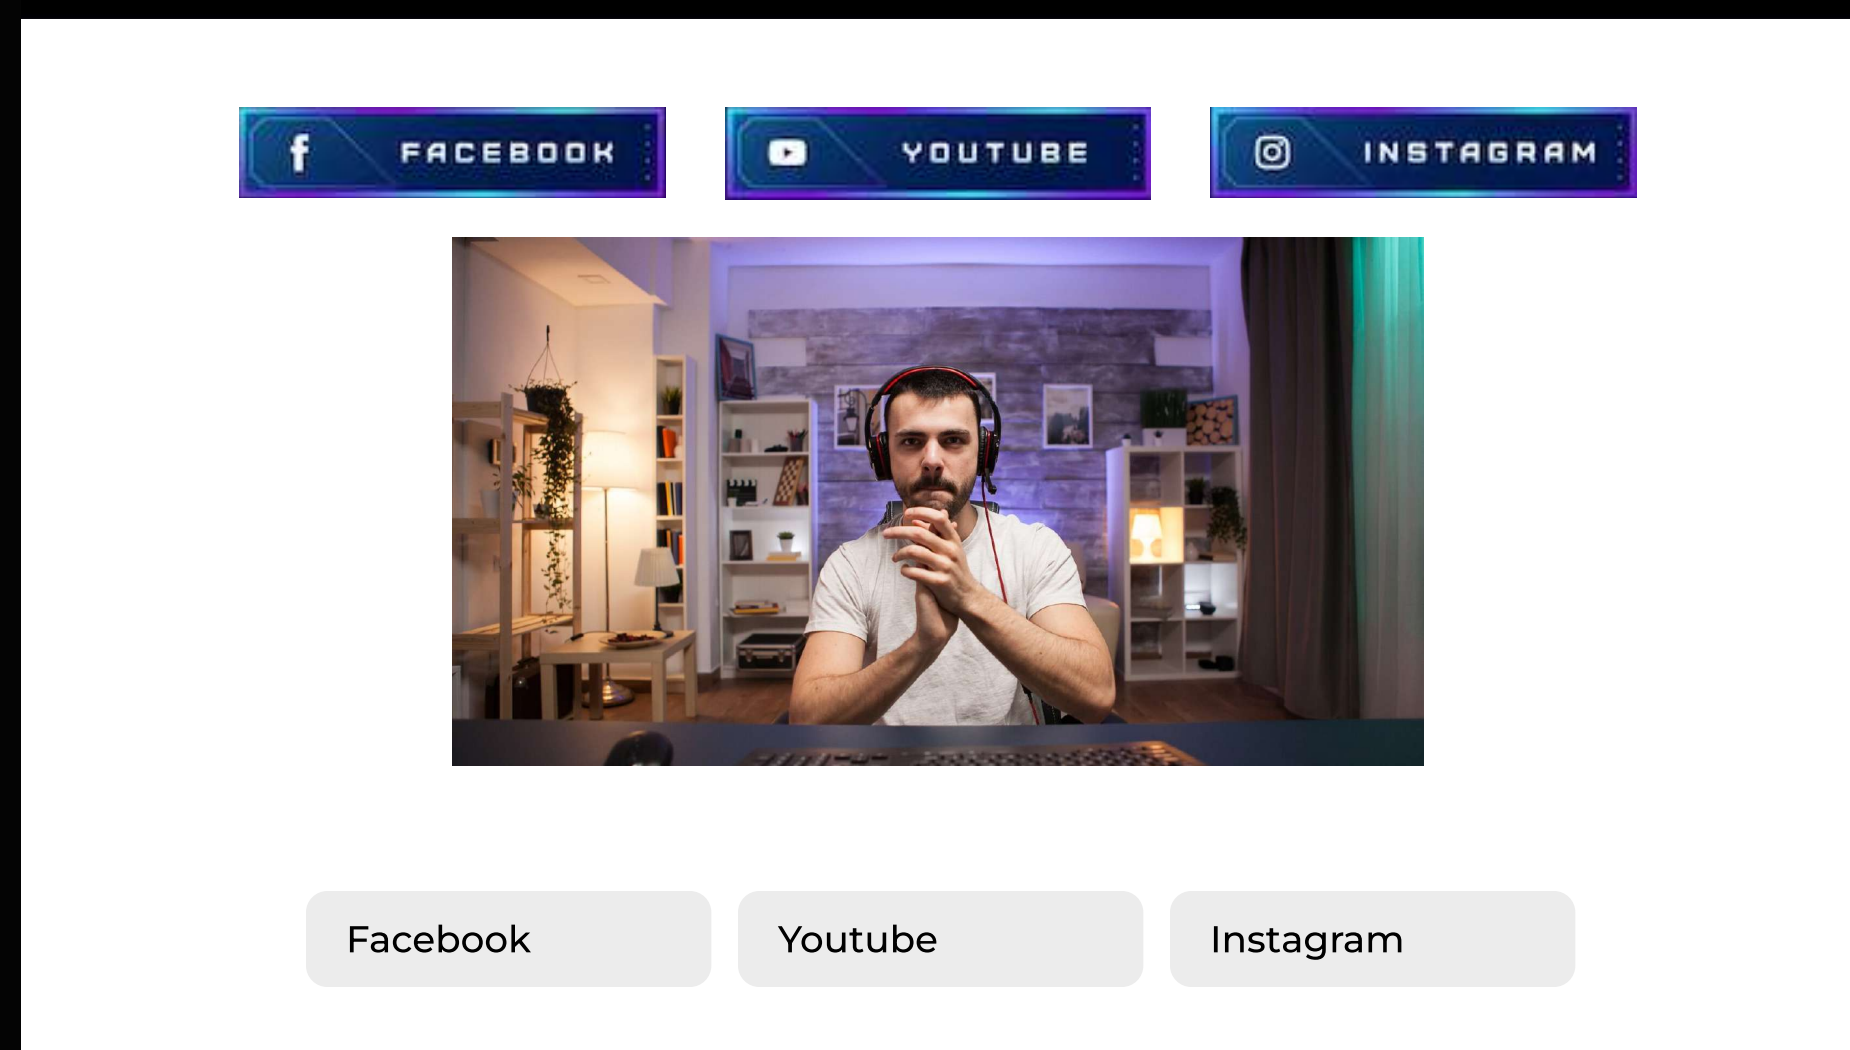

This function not only adds an extra layer of excitement for the audience but also provides a potential revenue stream for content creators and platforms through partnerships with betting services.

◆ 10. Donates integration

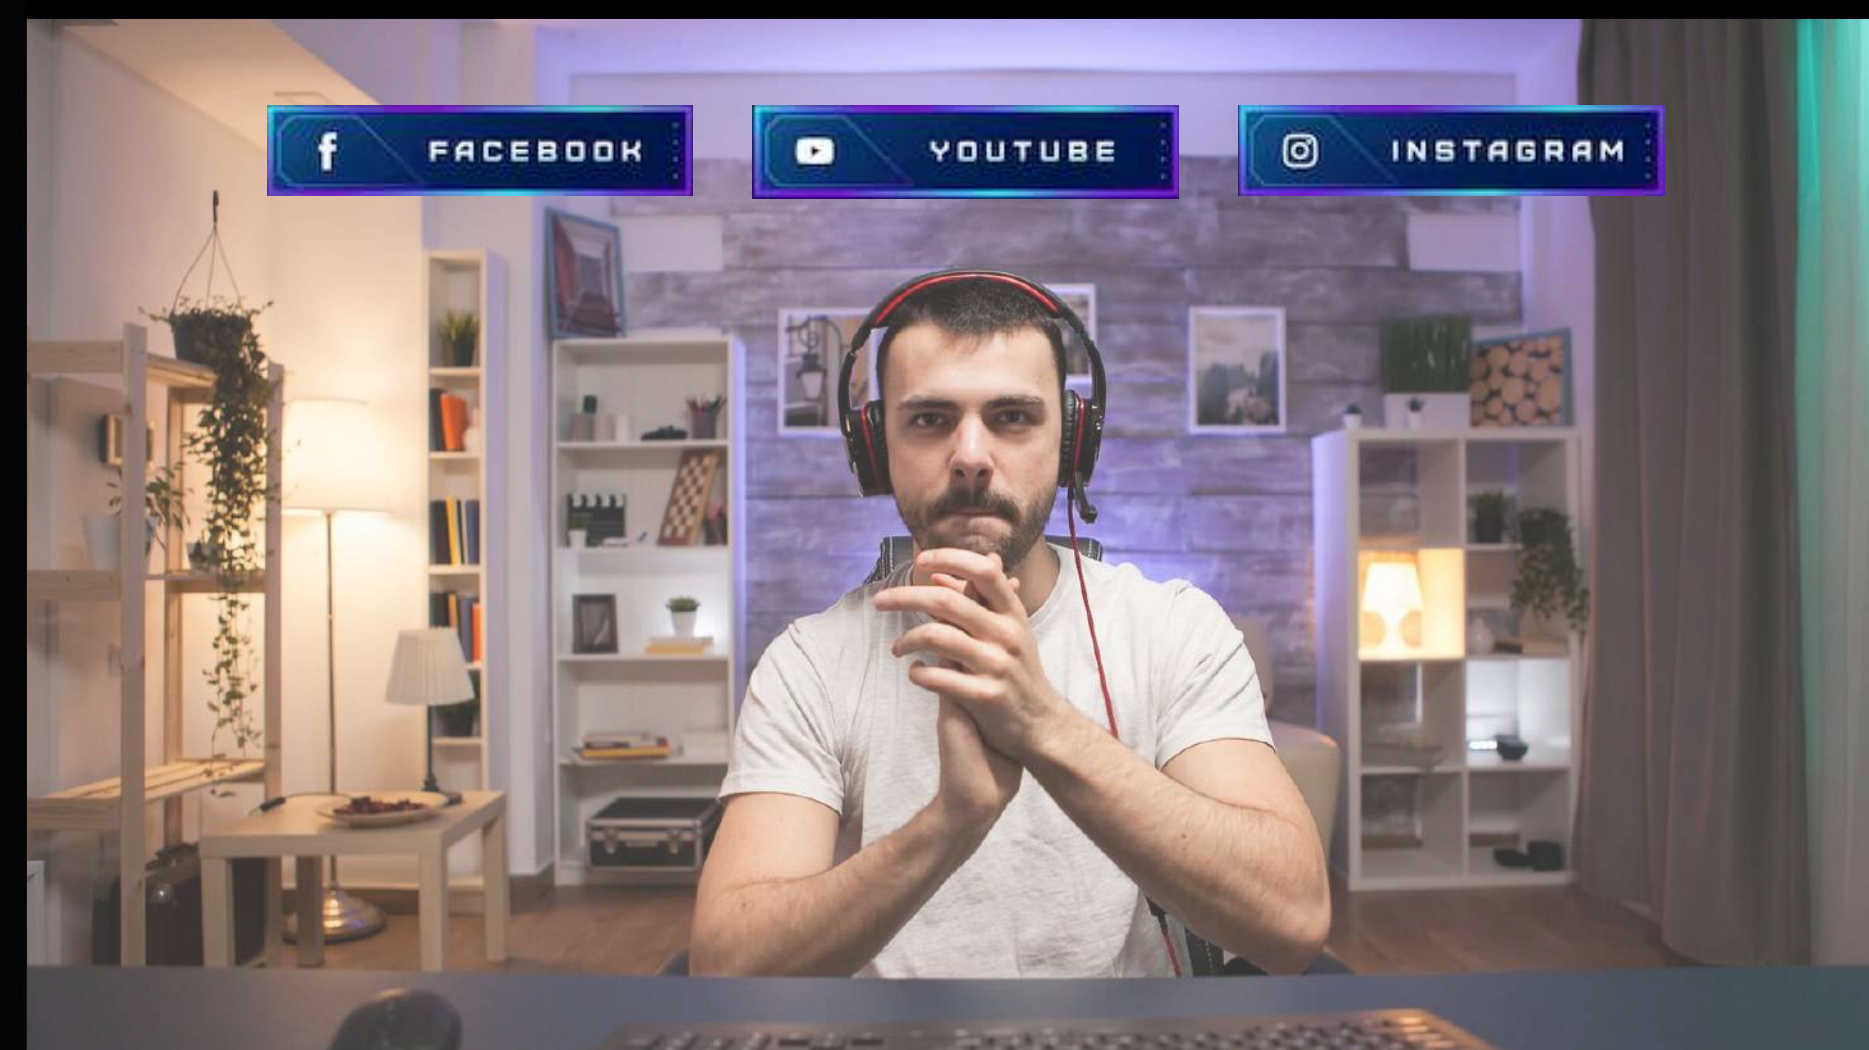

This function not only adds an extra layer of excitement for the audience but also provides a potential revenue stream for content creators and platforms through partnerships with betting services.
