Video Management System

UI/UX

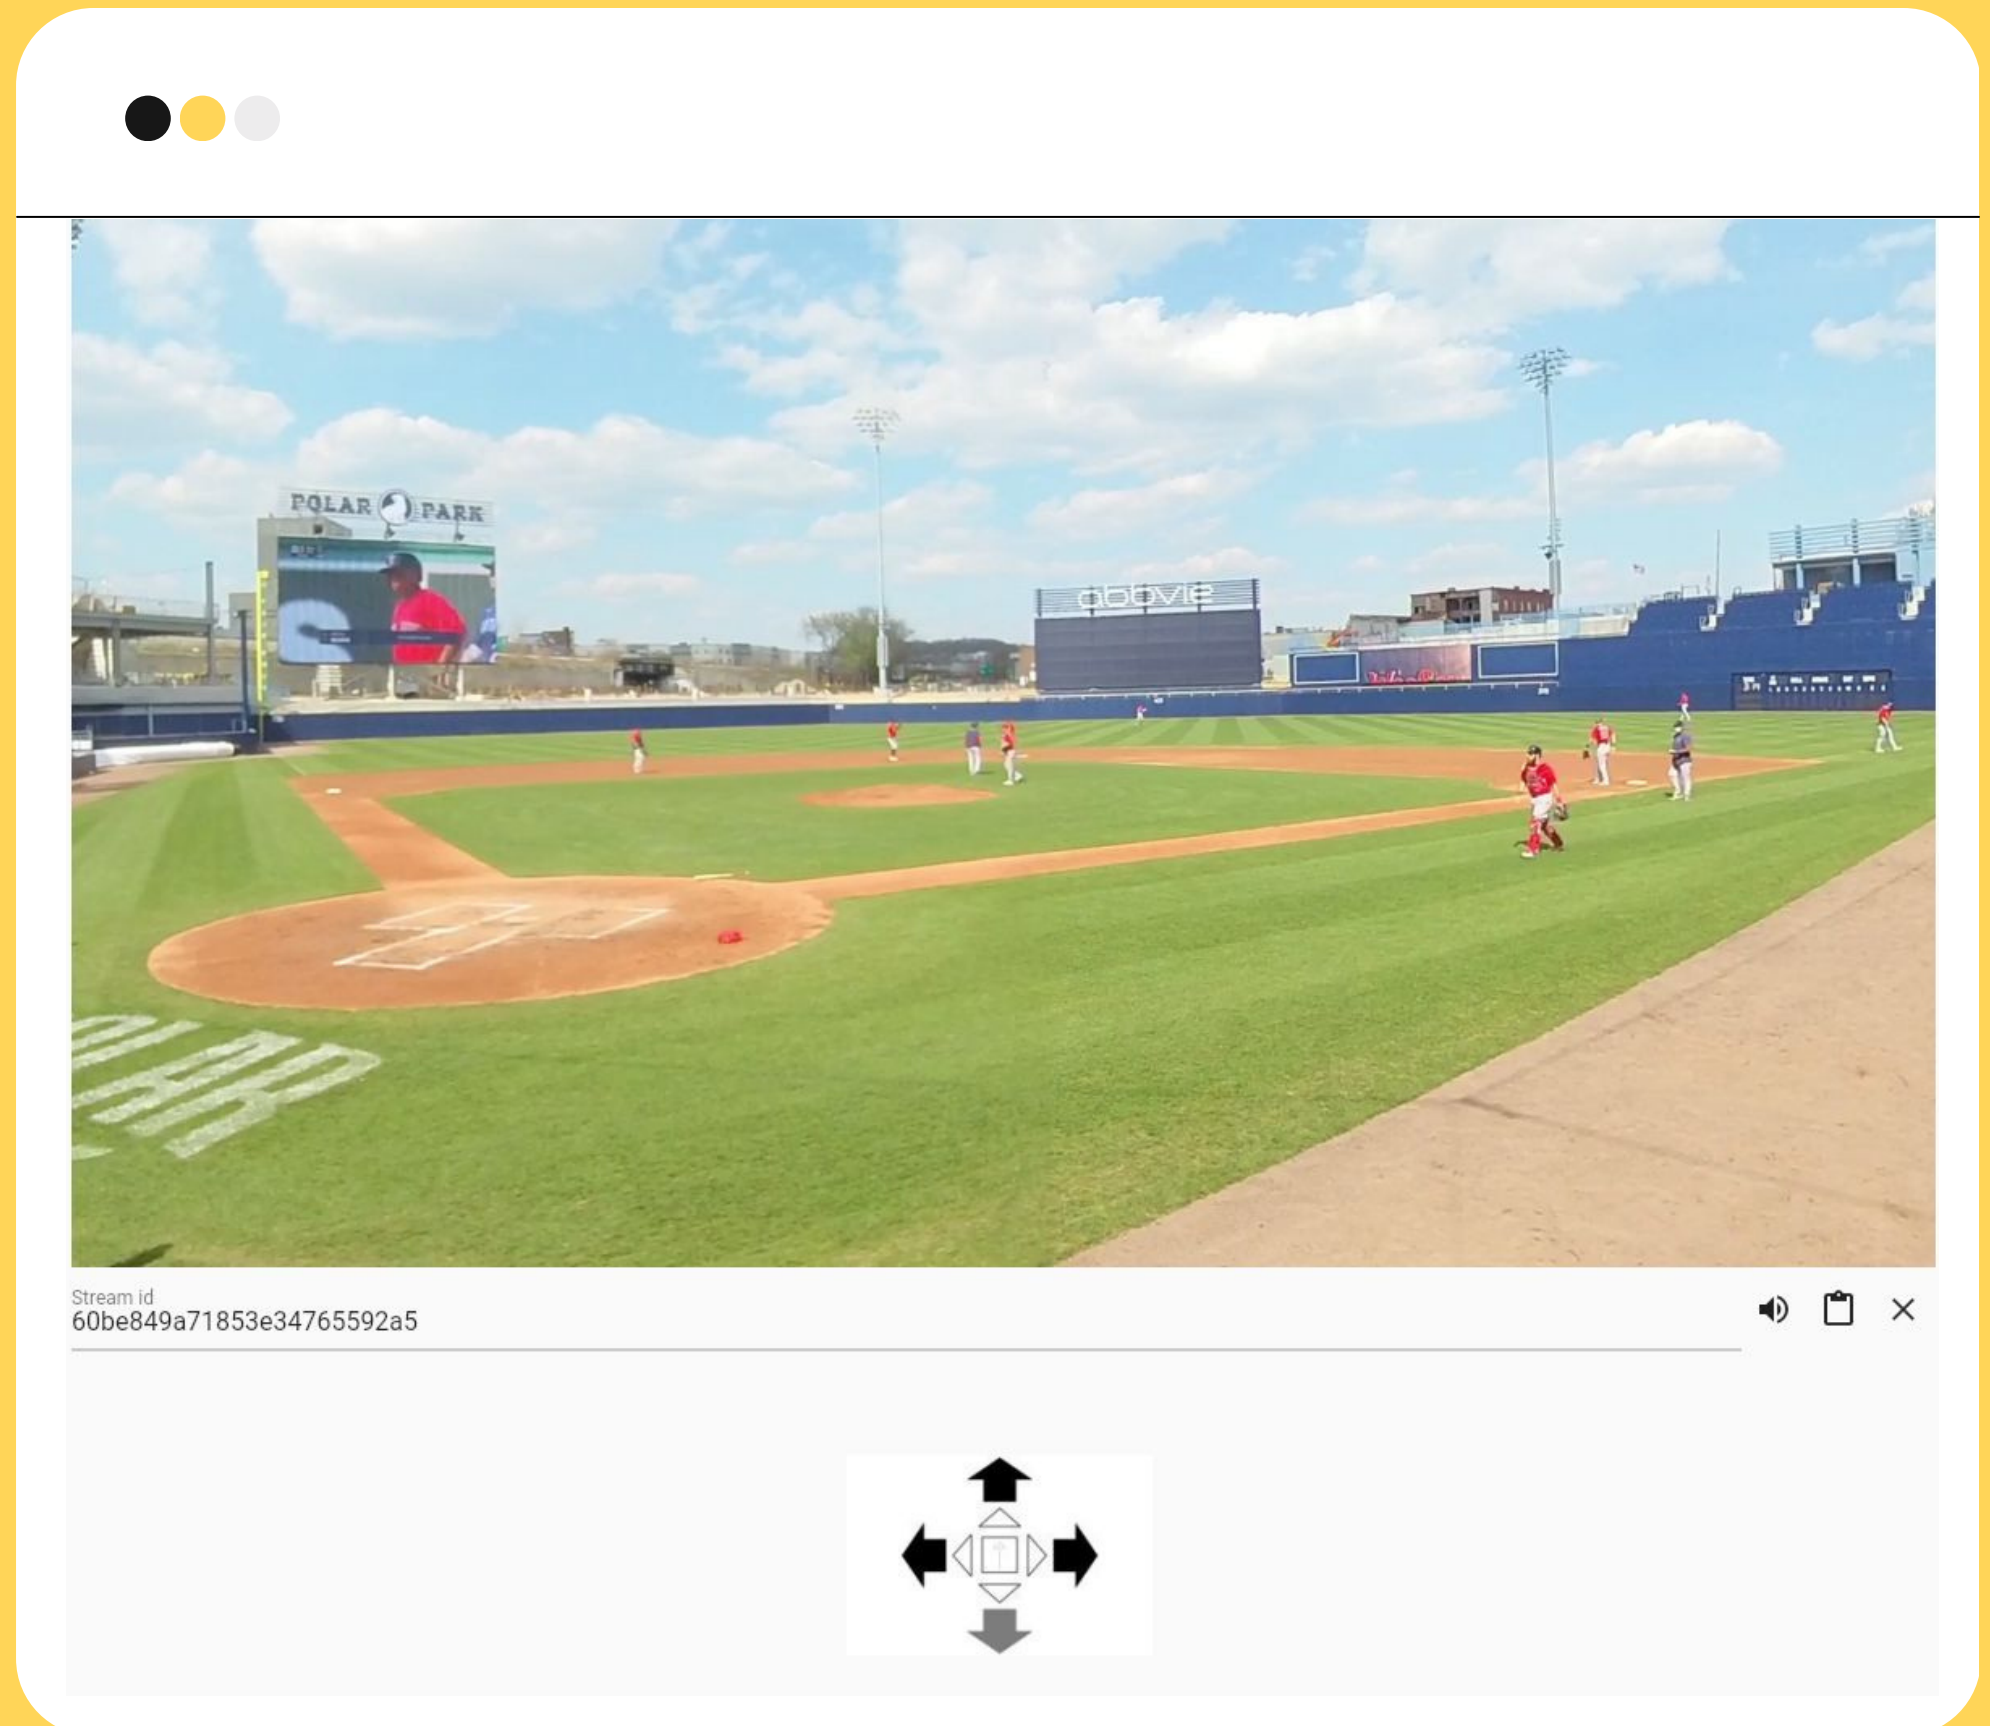

- Branded panel (with your logo and name)
- Providers roles: admin, read-only, support
- Signup form
- Service statistics
- User/Device analytics
- Devices management
- Notification events graph
- GEO based cameras (on map view)

Players

(iOs mobile/iPad, Android mobile/tablet,
Web application, Smart TV)

Features:

- Customised turn-key players with realtime viewing
- Embedded HTML player (iframe or page)
- Switching between cameras

Media service

Features:

- Self-hosted (on prime) or Cloud based setup independent media node, clusters
- RTSP, SRT, WebRTC, Cloud storages, Archives, Amazon Kinesis, Azure, Google storage, ONIF
- Restream, Transcode, logo/text overlays, Timelapse, Detection rectangles
- Realtime nototifications, AI models, Custom trained AI models
- Detection/Tracking modules

Protection

✓ Banned IP

✓ Login by email, password or code

✓ Email verification signup page

✓ Token based streams

- **Customisation**

We develop custom software solutions to run your neural network as an AI on Edge solution.

- **Efficiency**

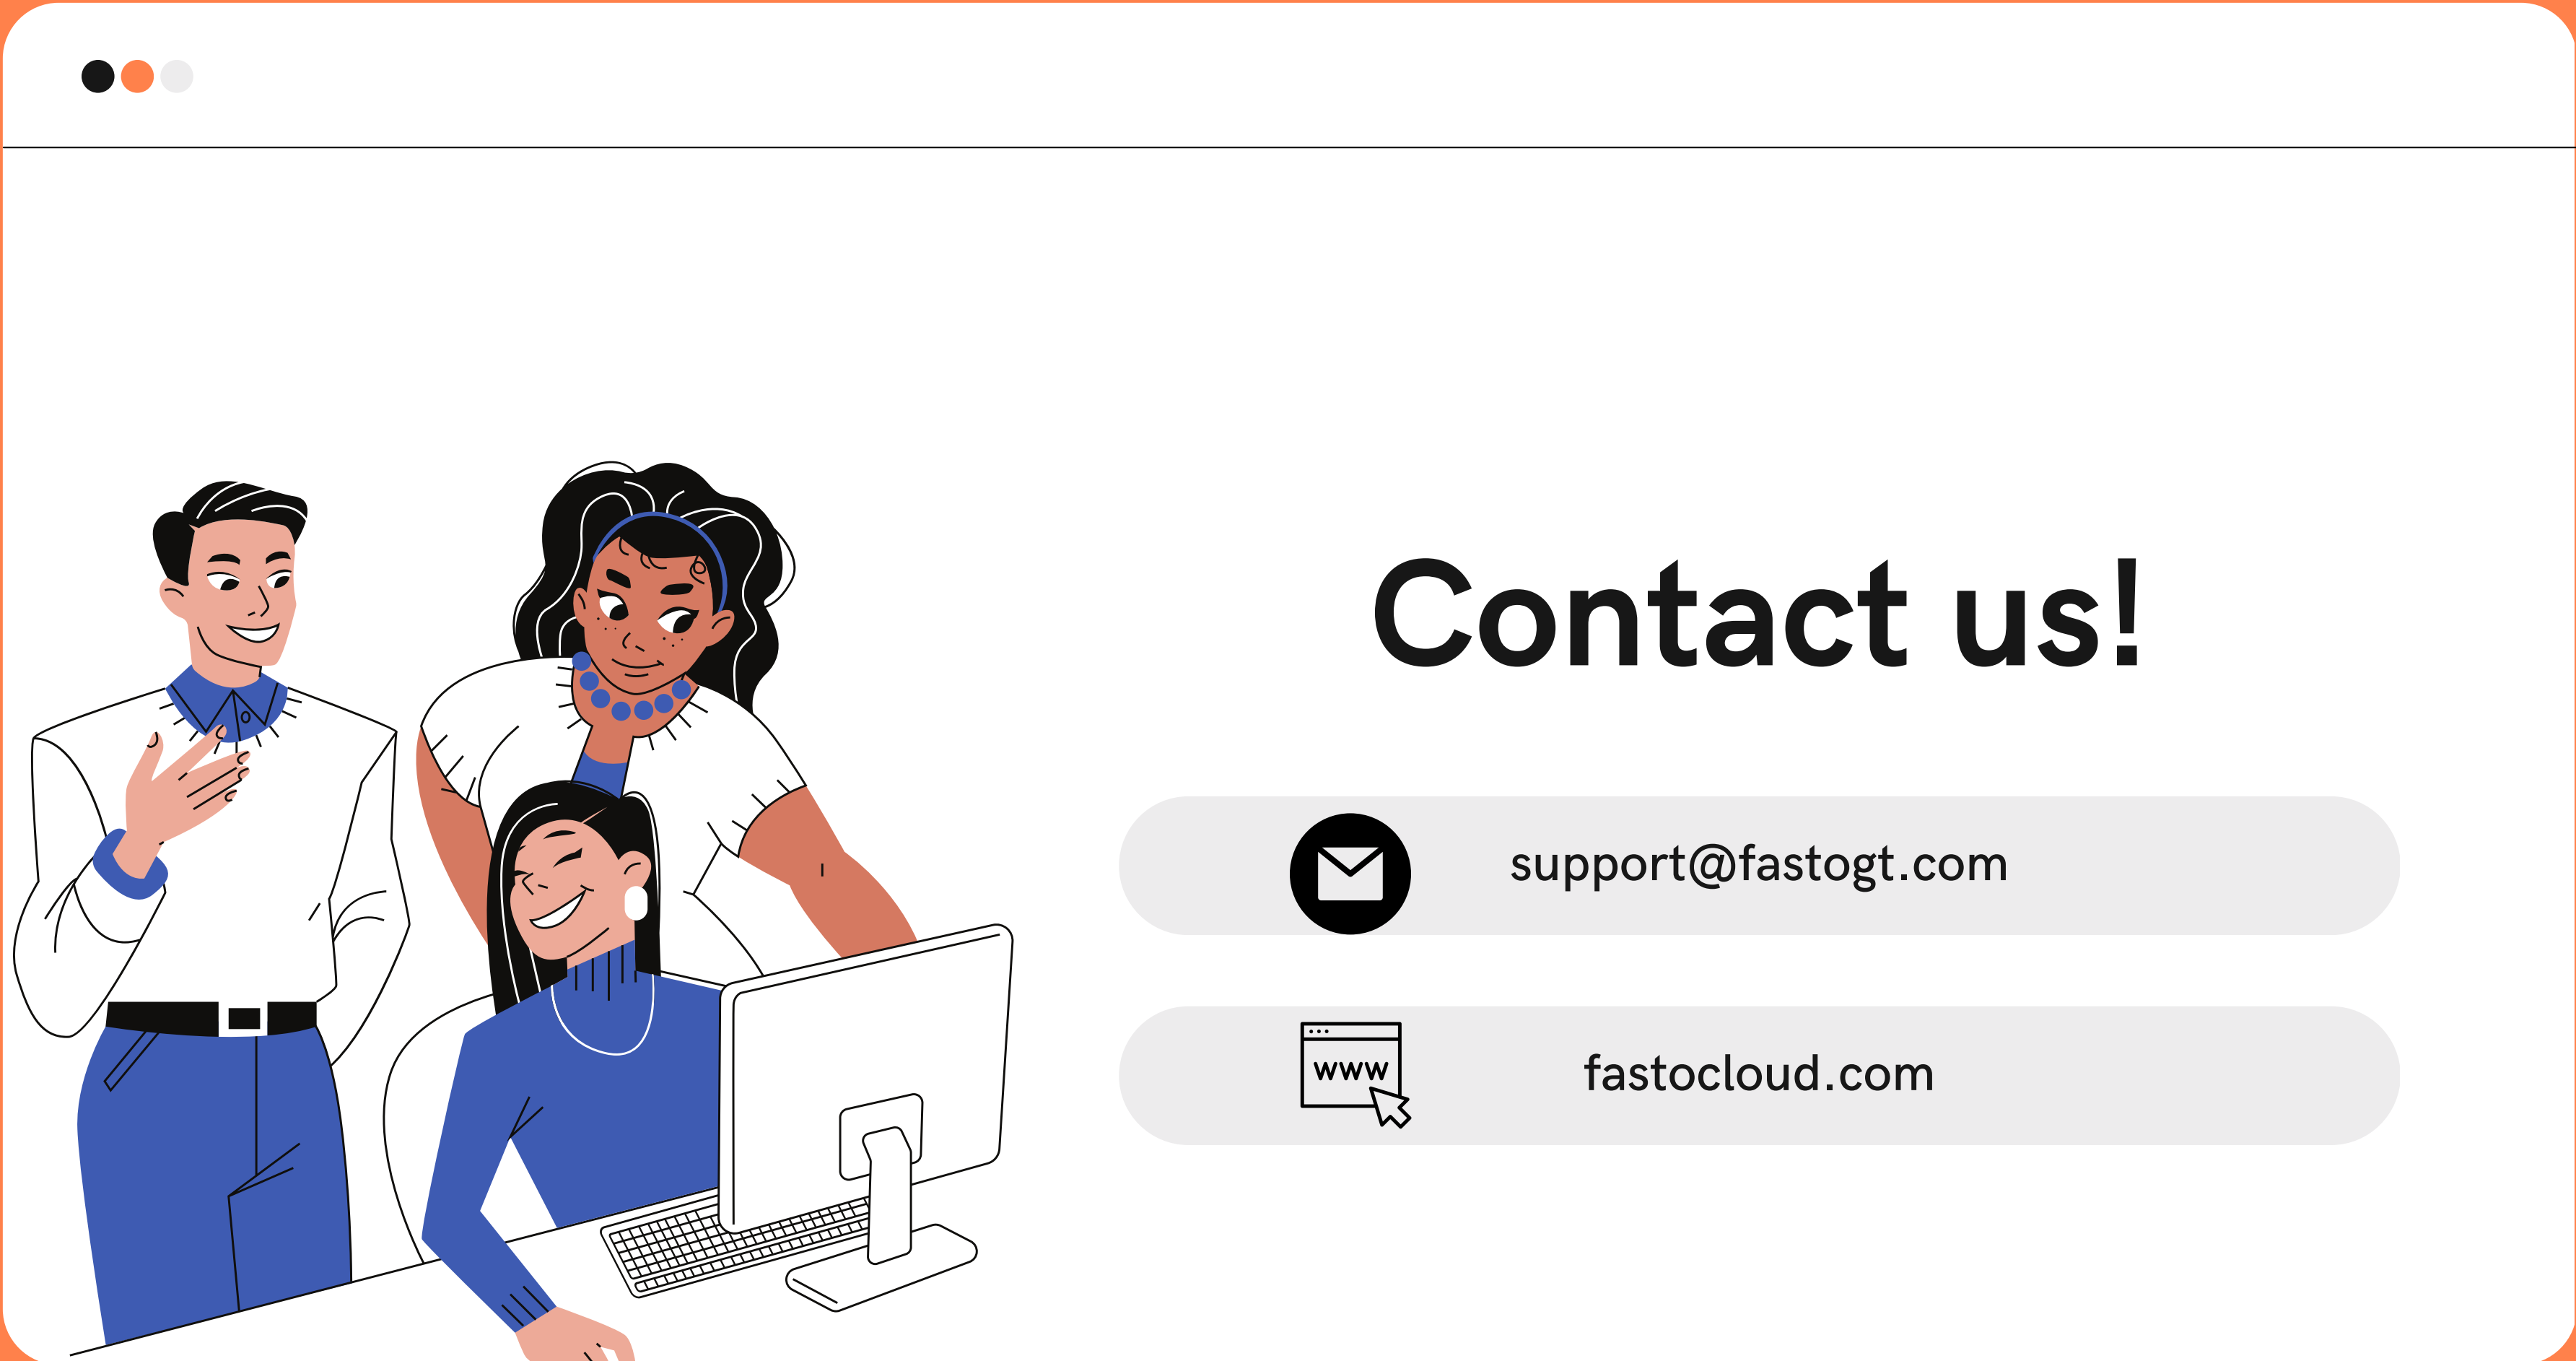

Our engineers are experienced in building projects on the latest platforms, so your product will be ready to market faster.

- **Flexibility**

With 7 years of experience in video streaming, we can handle any task: from software development to writing drivers and working on any hardware.
