FastoCloud Hotels

● Features

Create a convenient application for your hotel. It will have entertaining content for your clients, for example, they will be able to watch various channels, movies, and TV series. Additionally, the application will help enhance your service. Clients will be able to order everything they need to their rooms, such as food, drinks, and various services that you offer.

Hotel Security

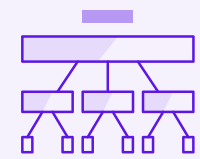

● Features

Introducing FastoCloud for Hotel Video Surveillance—an integrated solution featuring components to seamlessly connect IP cameras, enable playback across diverse devices, record footage, establish secure surveillance points, and harness advanced video analytics such as number plate and facial recognition. Elevate your hotel's security and monitoring capabilities effortlessly.

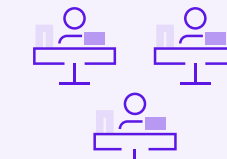

Convenient application

Access from anywhere in the world with a convenient app
