

FastoCloud Webinars

WHAT DO WE PROVIDE

Easy Setup

Set-it-and-forget-it tech and complete.

Cloud Storage

All of your recordings can be stored in our cloud solution where you can build an archive.

UltraHD 4K Quality

Our IP cameras have 4K Ultra-High Definition quality with a framerate up to 60 fps.

Downloadable Recordings

Download the full recording and export it to other applications and platforms.

WEBINARS

◆ 1. Recording to Archive

- Fully-featured built-in video archive
- Unlimited depth of video archive

◆ 2. Customization

We offers a variety of applications which can be White Labeled to your company brand.

◆ 3. Integration

We build integrations with video analysis software solutions in order to stream the live video to these applications. The livestream can be delivered in RTSP and RTMP streaming formats. With this option you can real time capture the video directly into your software suite.

◆ 4. Corporative setup

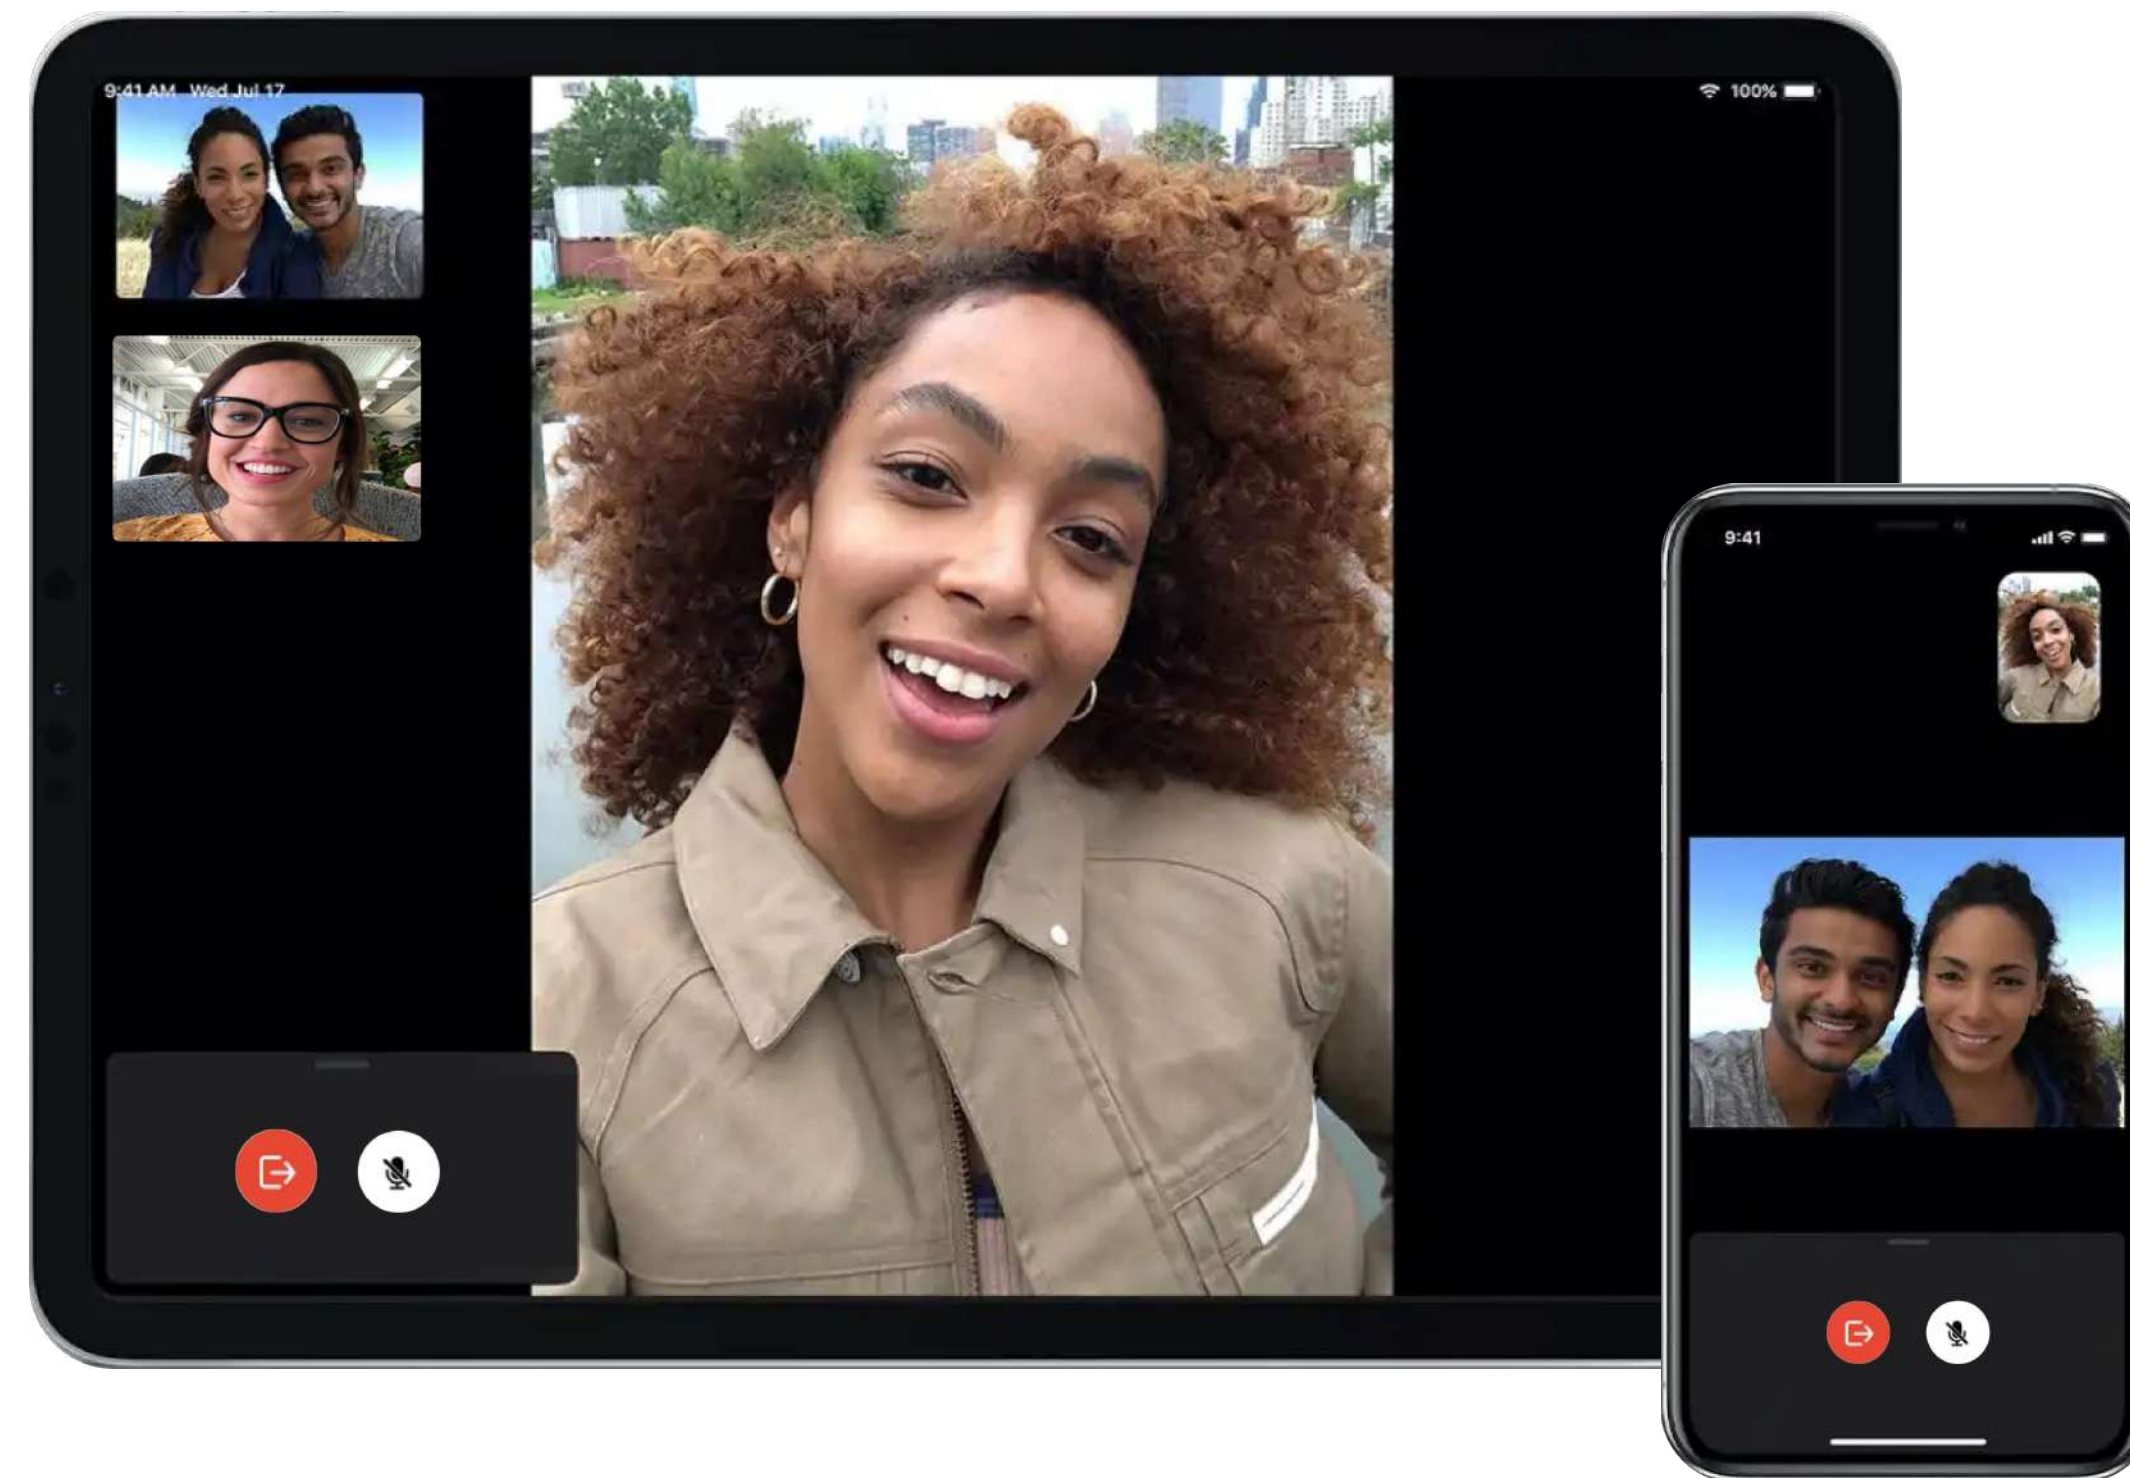

Promoting efficient communication and collaboration in a corporate context.

◆ 5. Online chat

Allowing participants to engage with the presenter and fellow attendees, ask questions, share insights, and contribute to the discussion in real-time, enhancing the overall learning and networking experience.

◆ 6. User interaction

Is integral to fostering engagement and active participation, enabling attendees to ask questions, provide feedback, and contribute to discussions, creating a more dynamic and inclusive learning experience.
