# End-to-end Solution Online parking

Parking is no longer a challenge for your client

**Includes:**

**Admin panel**

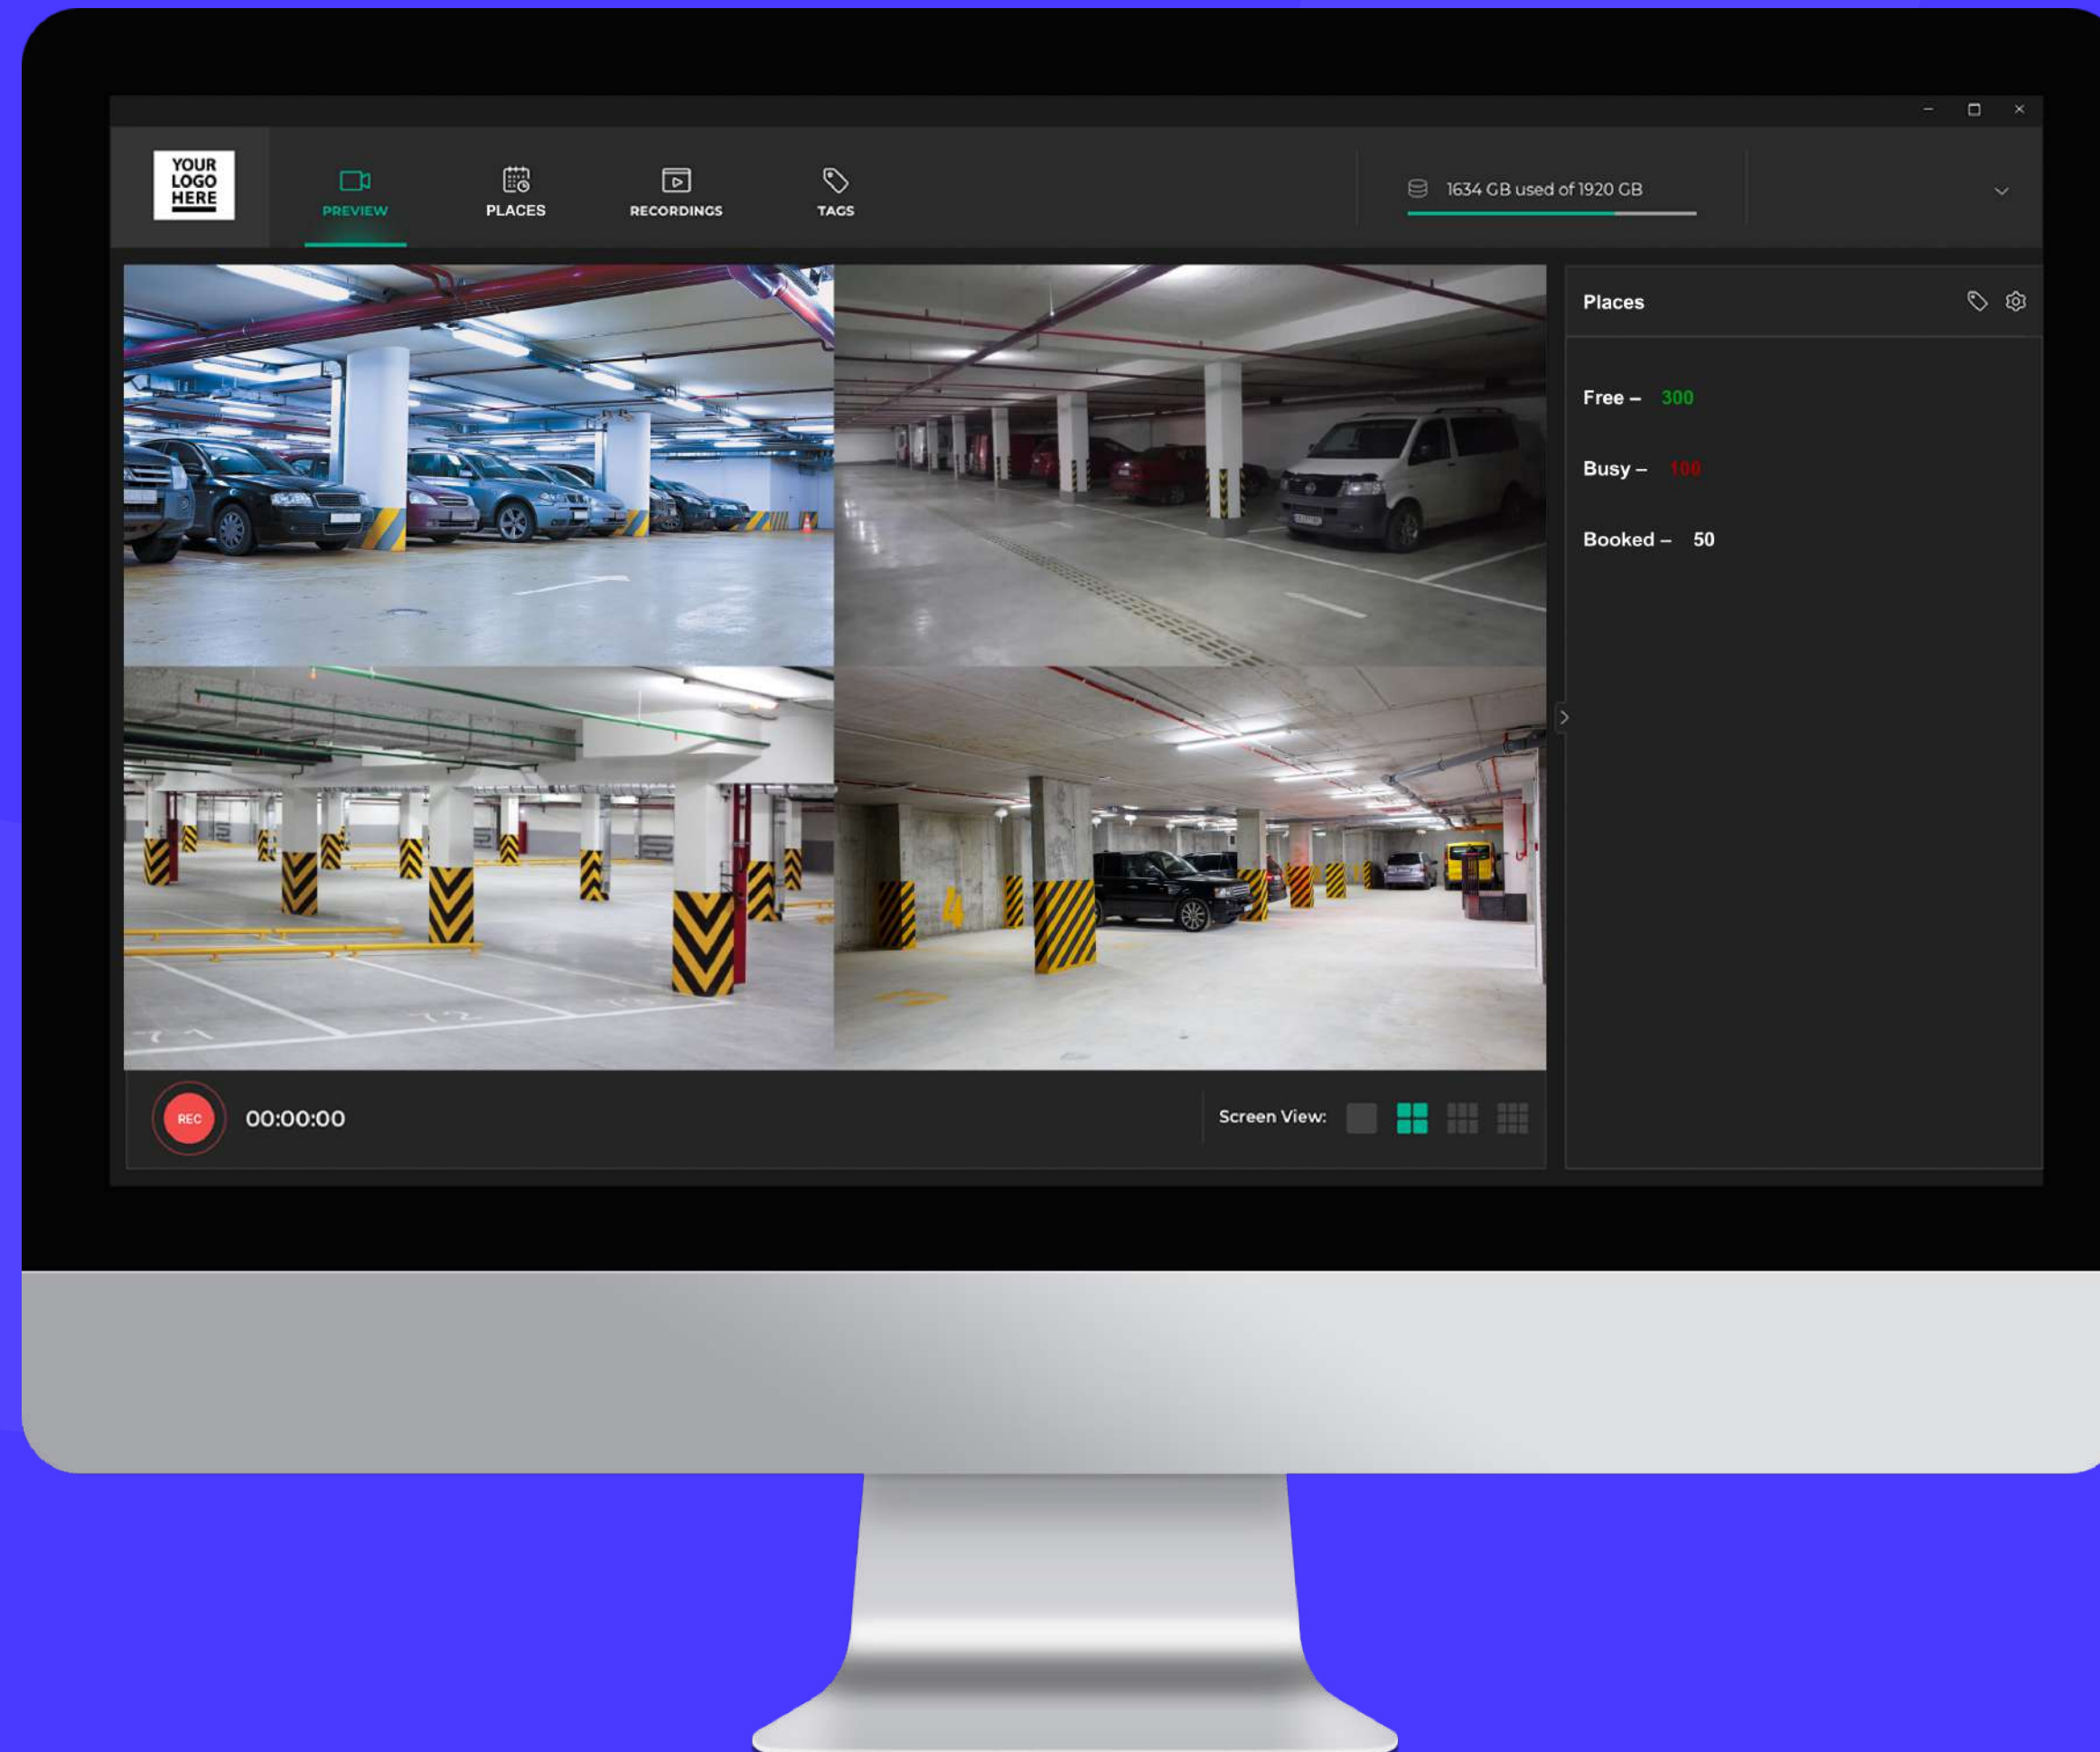

**Website**

**Smart cameras**

# Admin panel

Allows real-time monitoring of parking lot and parking equipment status, as well as remote parking management.

## Features:

**Advanced analytical reports**

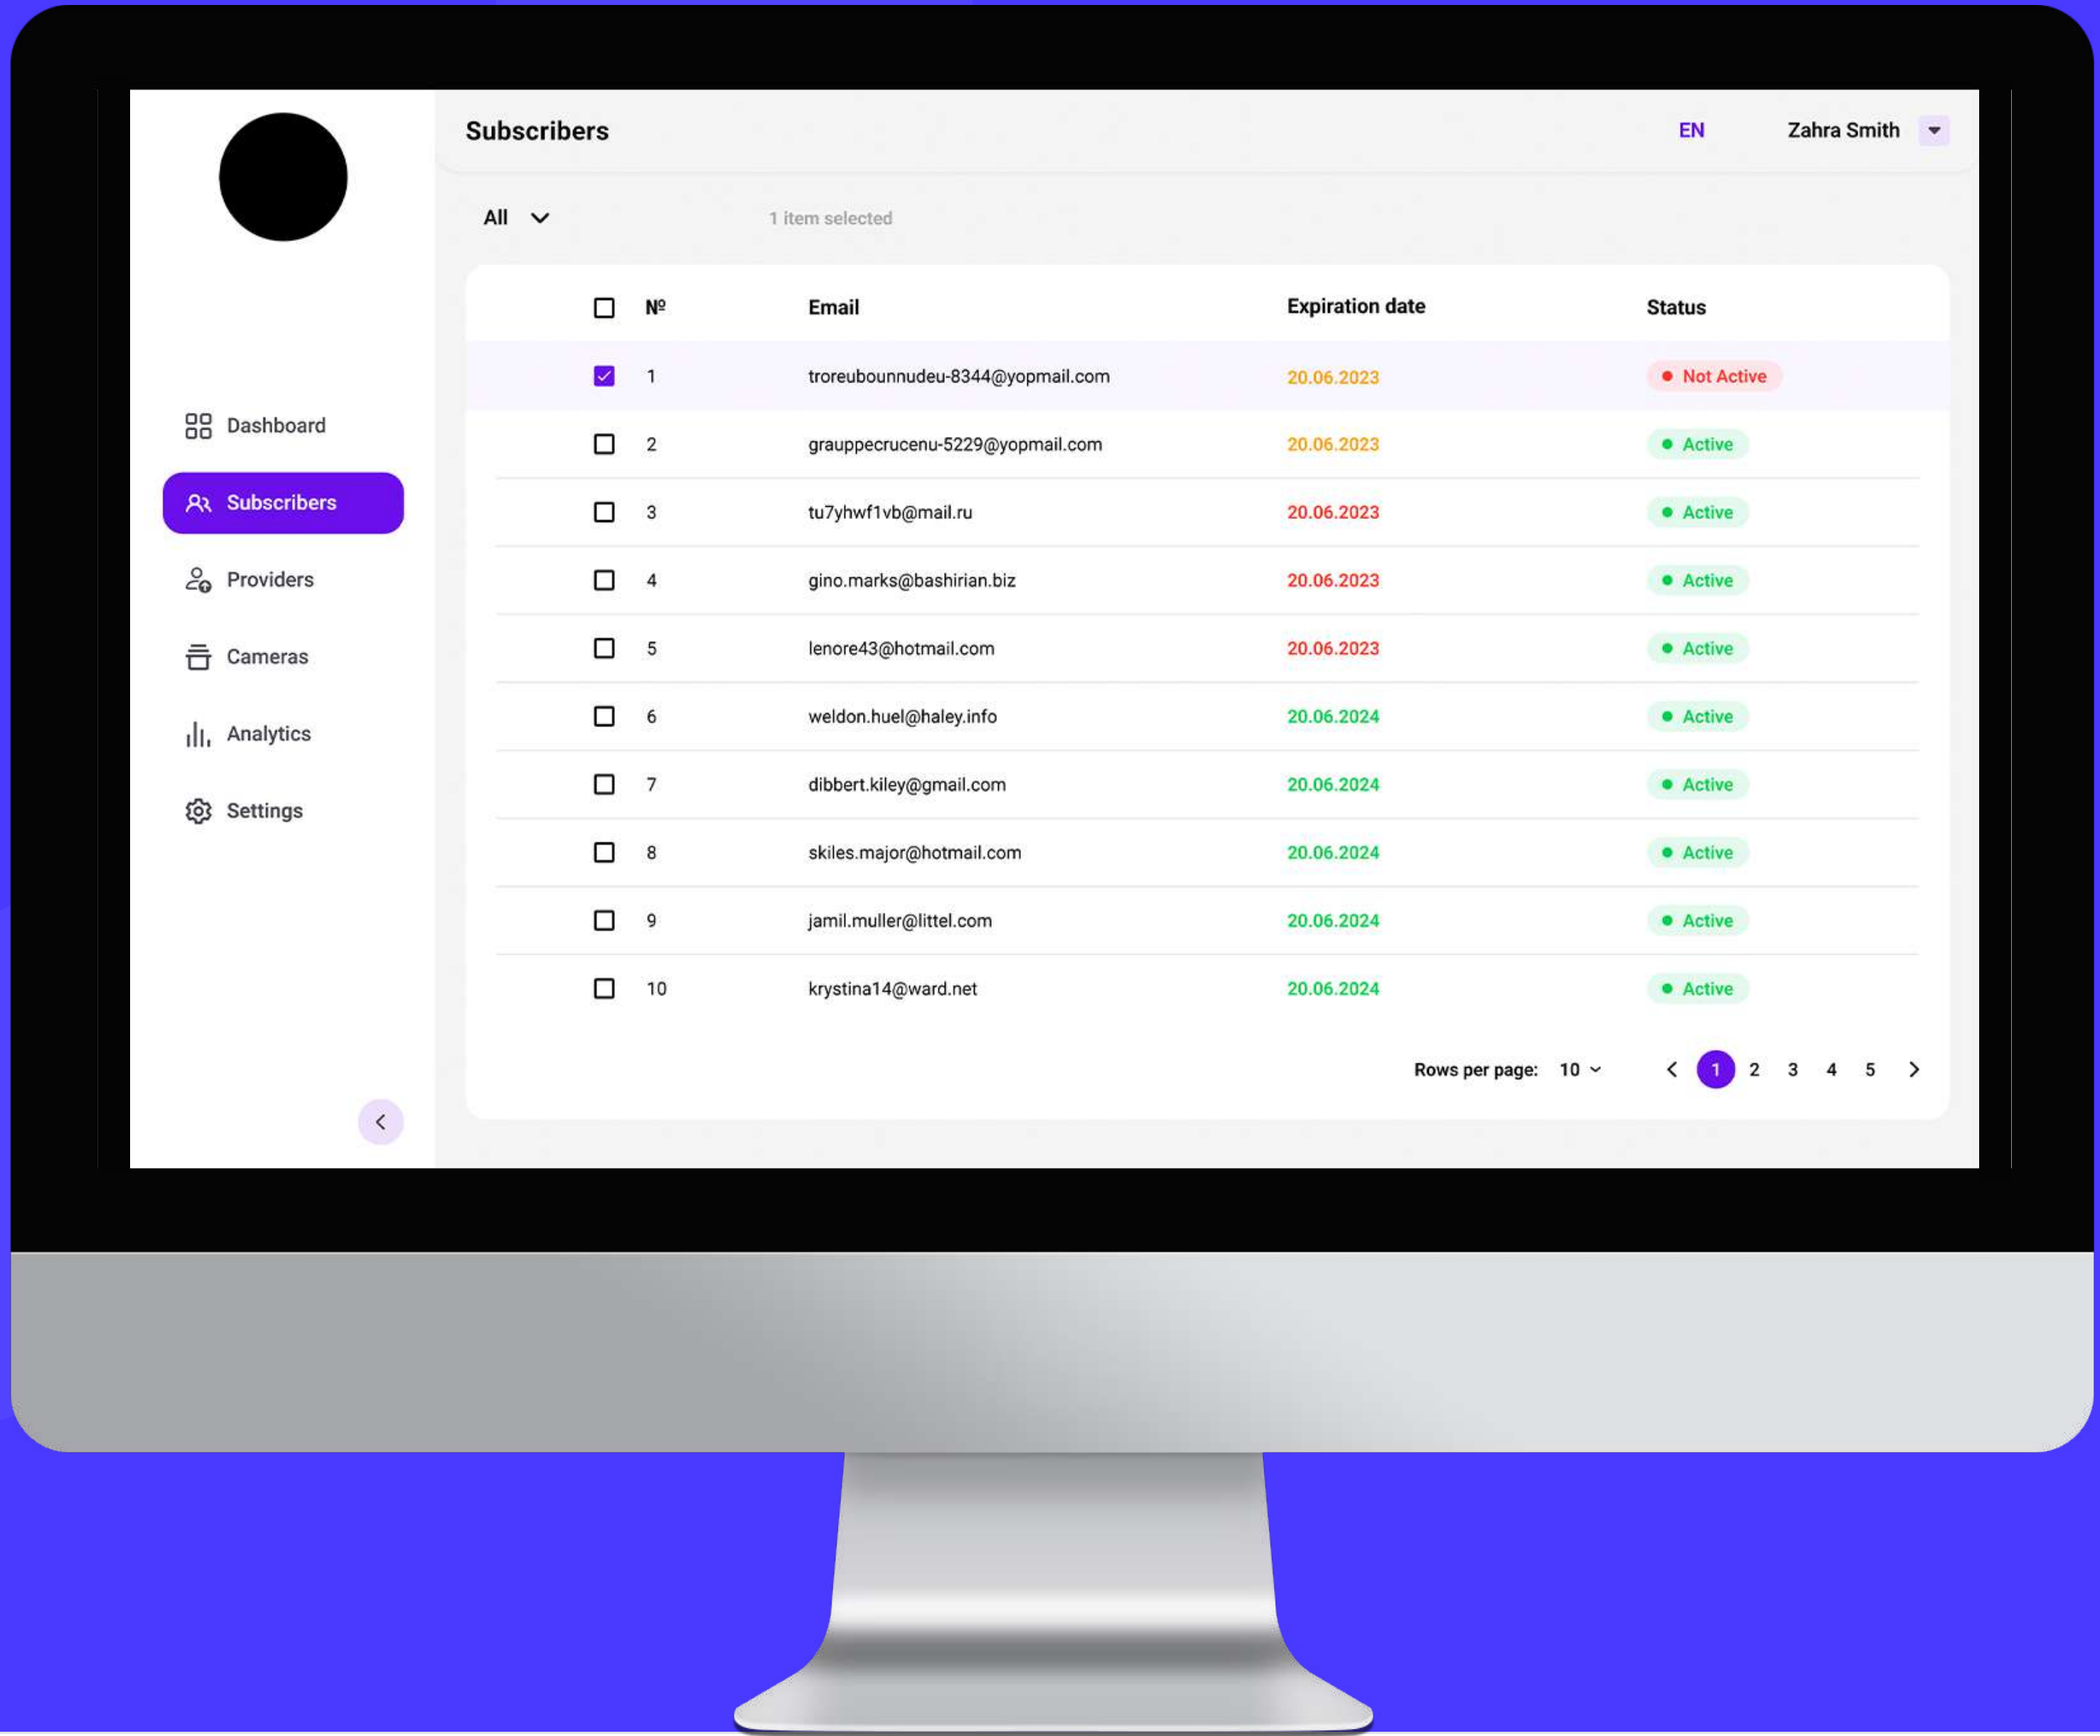

**Ability to make changes to the reservation**

**Online monitoring using video surveillance cameras**

**Access to video surveillance camera recordings**

# Smart cameras

Our camera solution utilizes artificial intelligence to gather data, analyze it, and provide the necessary actions.

## Features:

- 01 License plate detection and car license recognition
- 02 Opening/closing the barrier using the car's plate number
- 03 Parking security

# Website

Online parking is a guarantee of available space, time savings, and the assurance that a parking spot will be available in the desired area.

## Features:

Integrated payment system

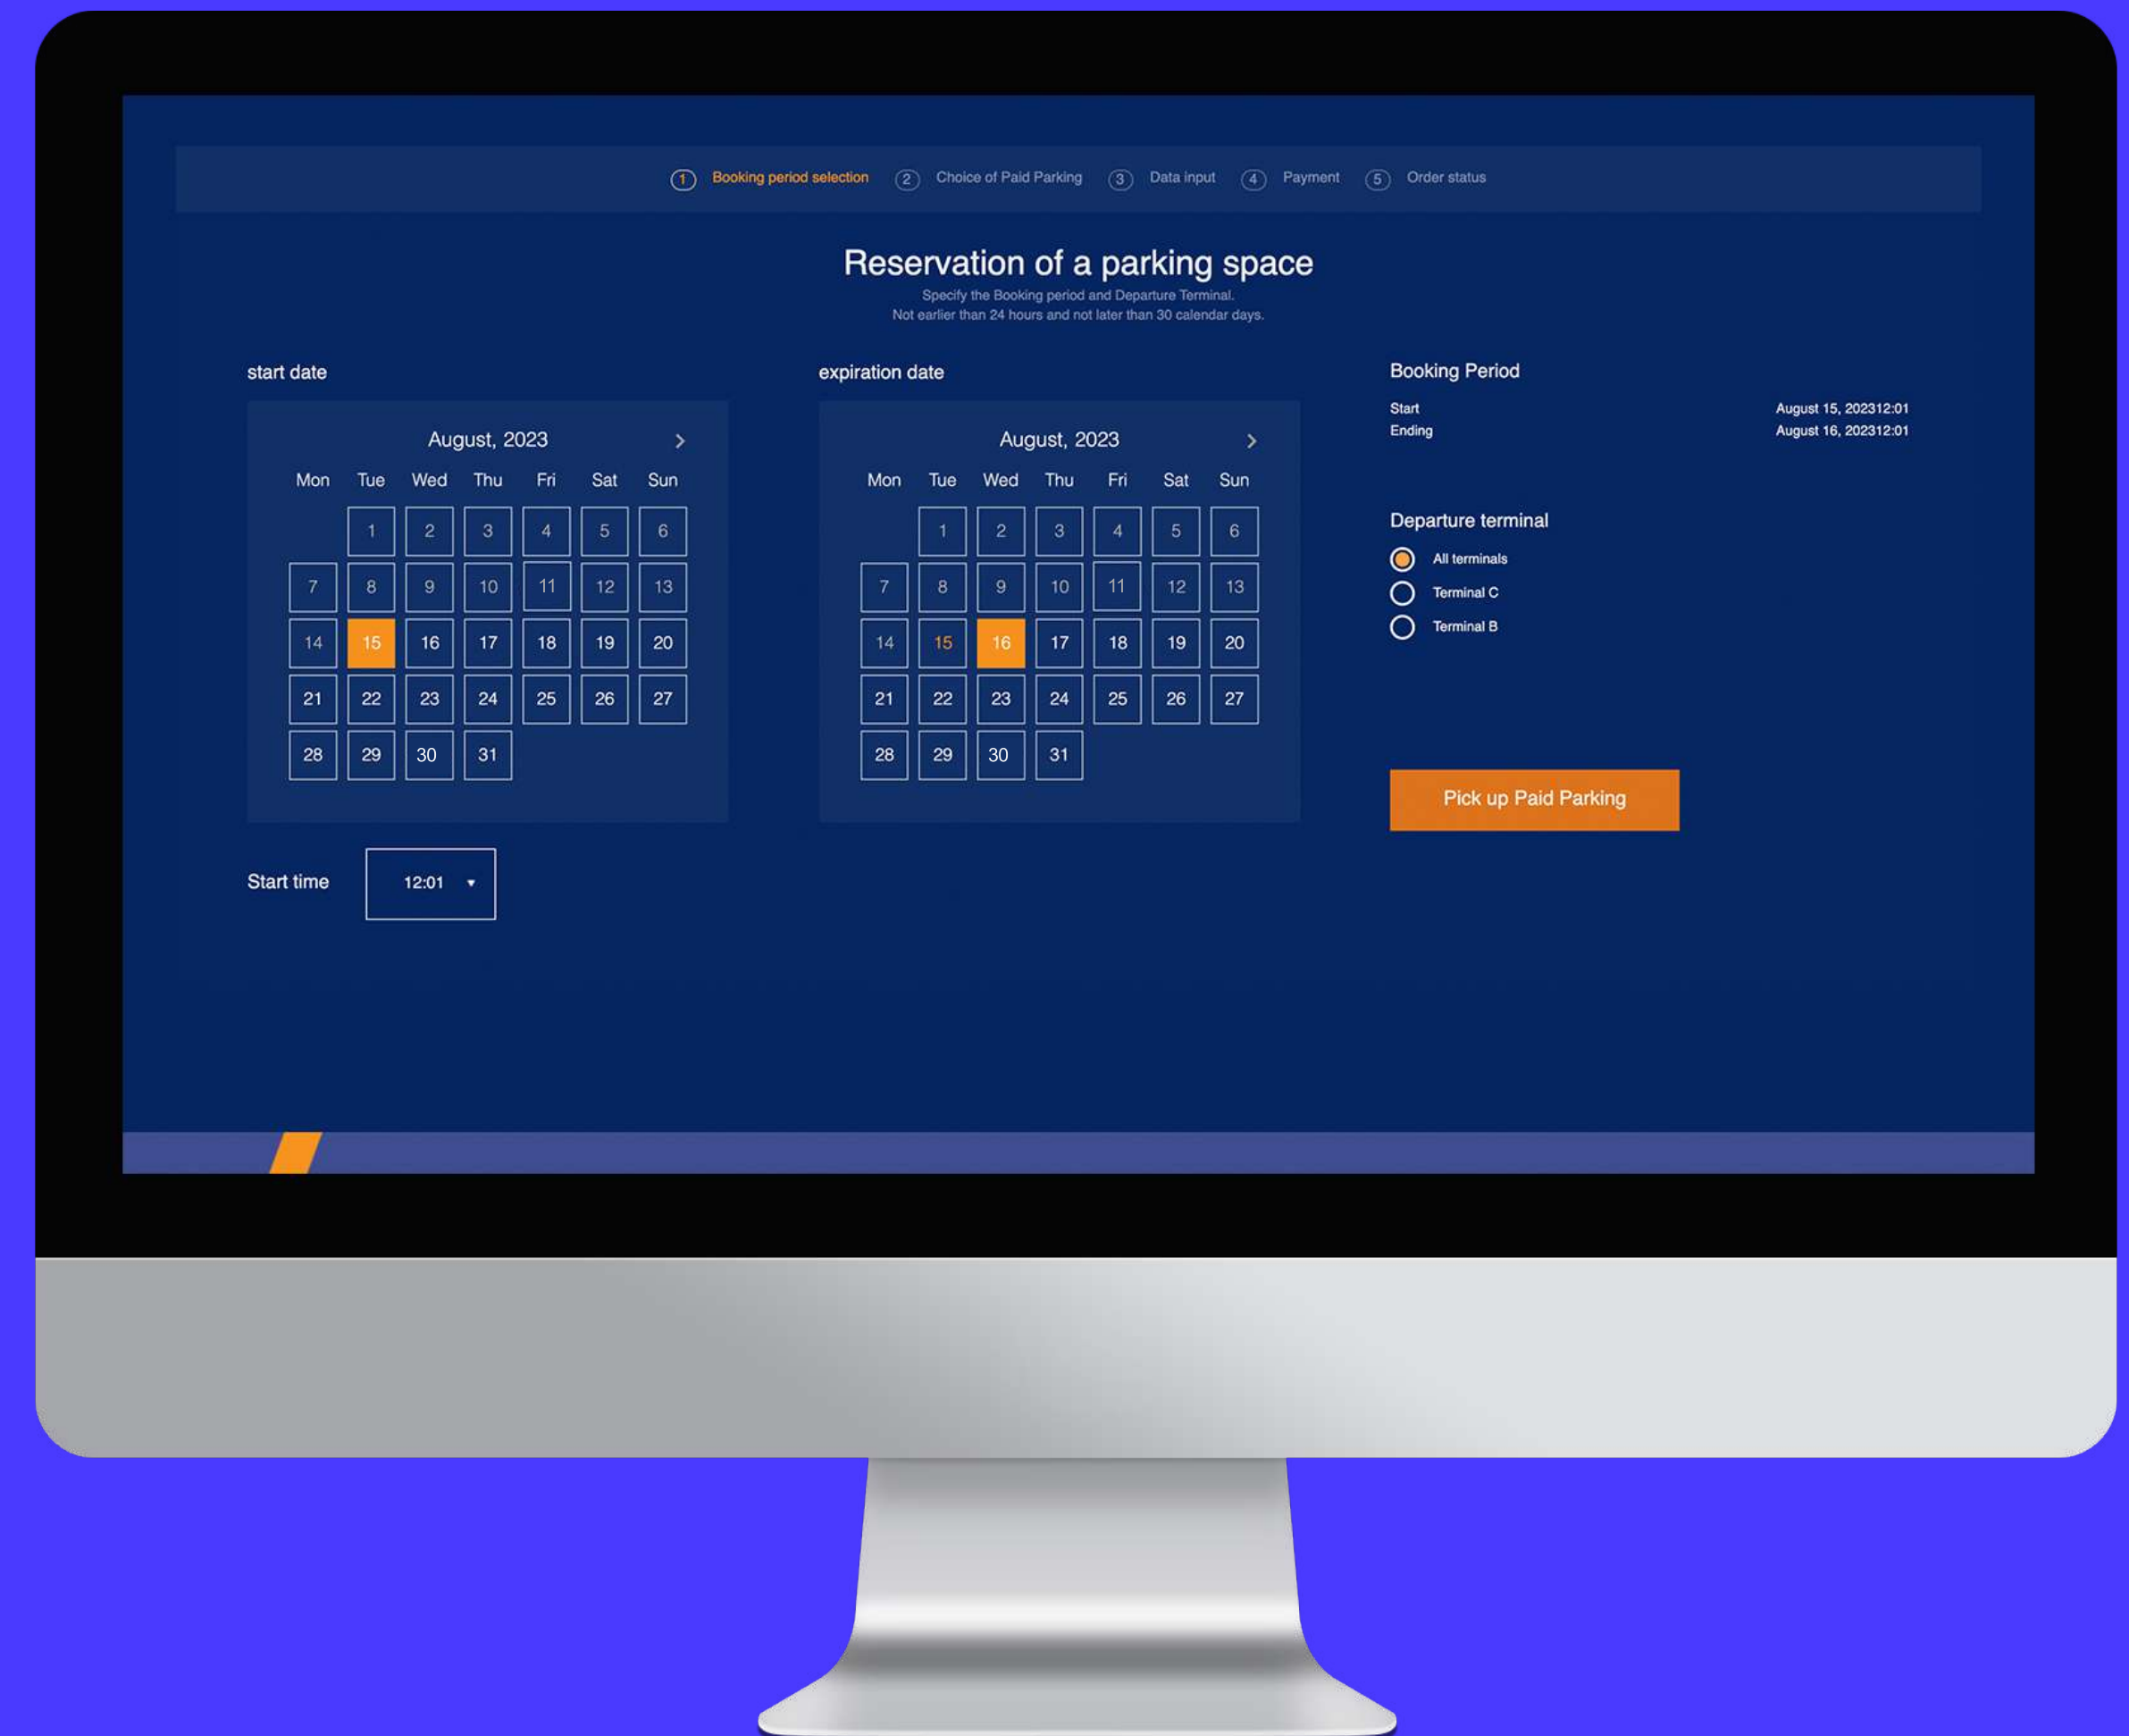

Live chat with customer support

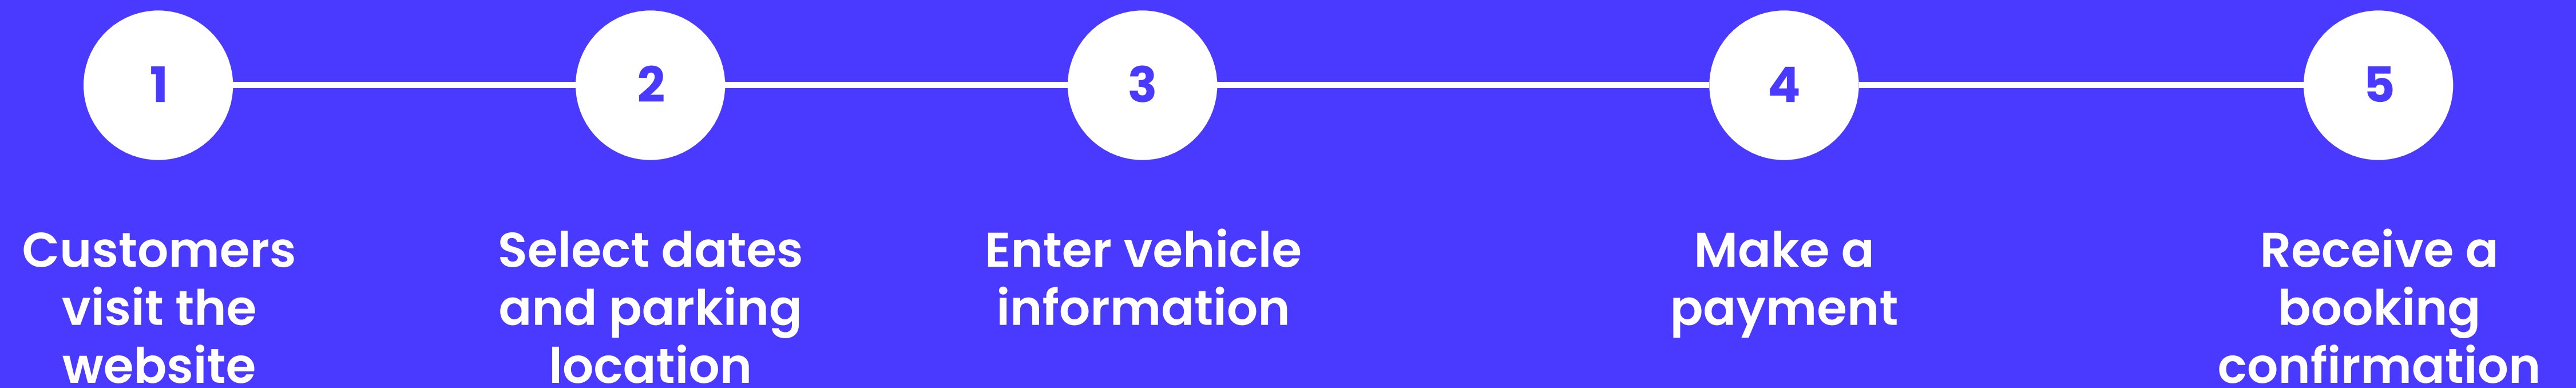

Online booking

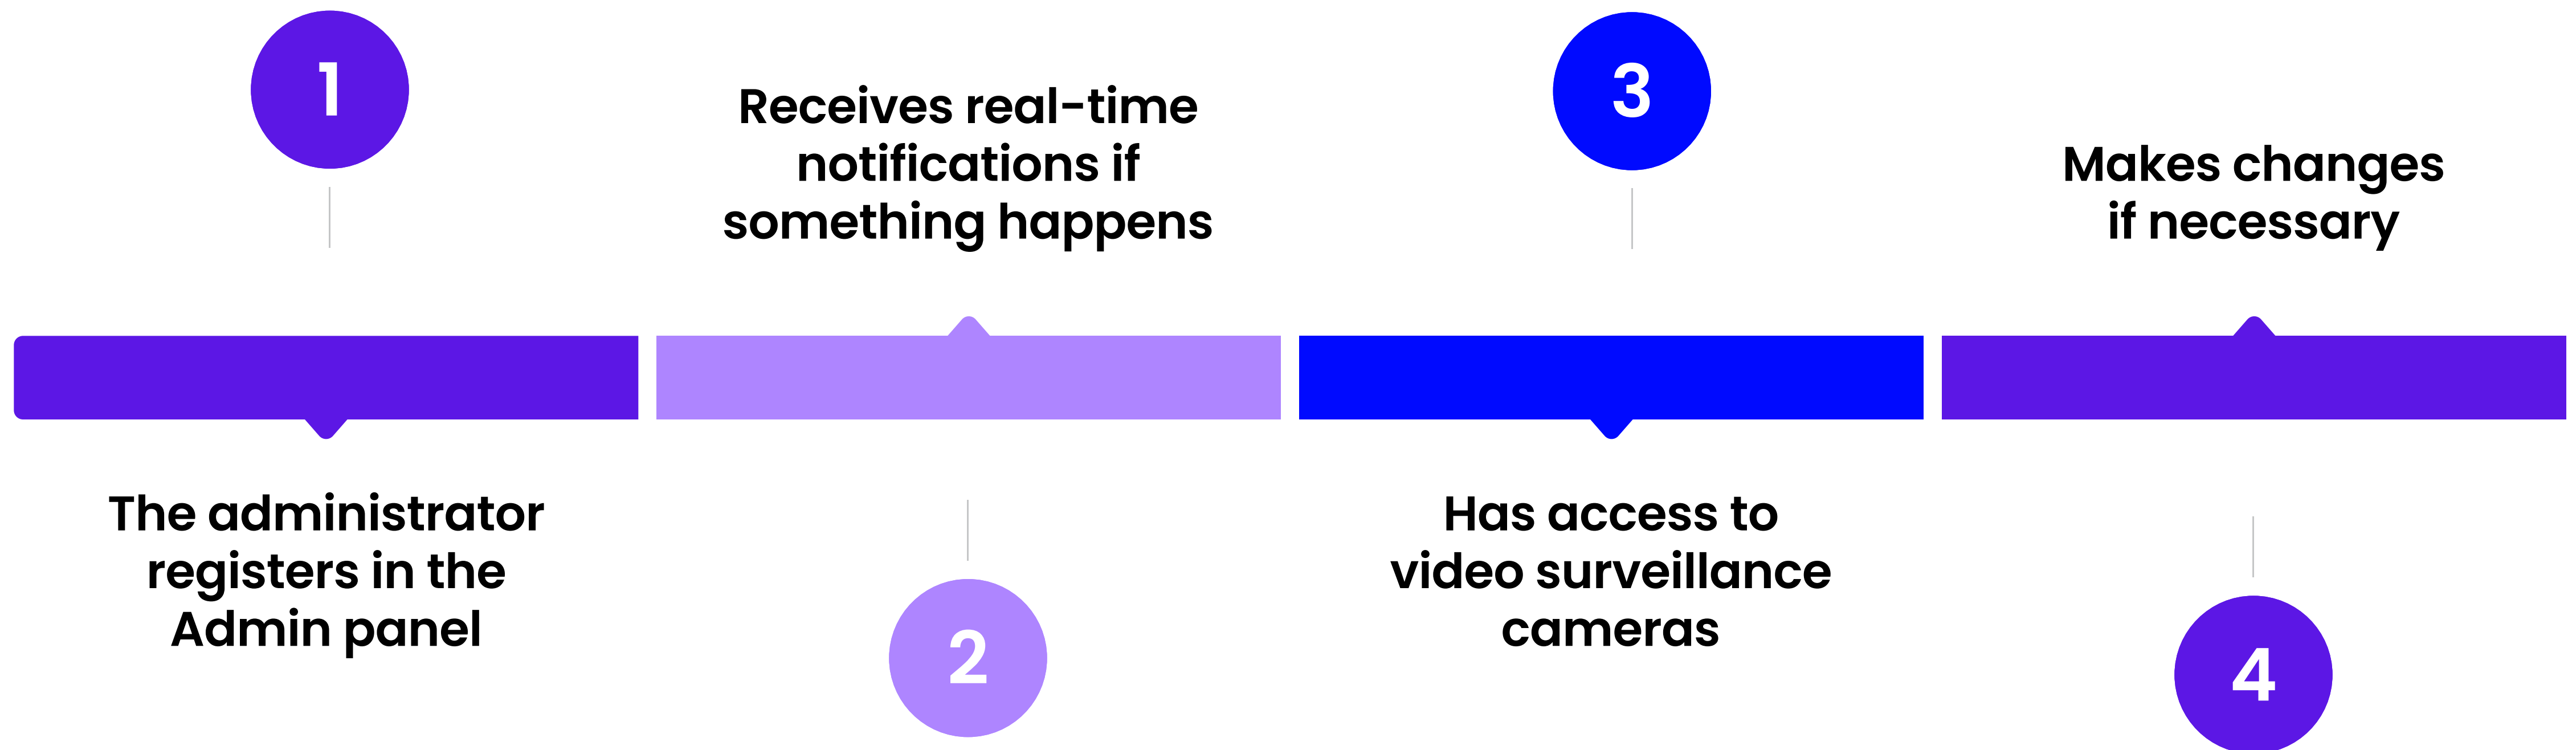

Online early end to parking session
