Schedule

Make programming your channel is done in the schedule. It's a software for broadcast management. You can add a content and work with your colleagues at the same time from different places.

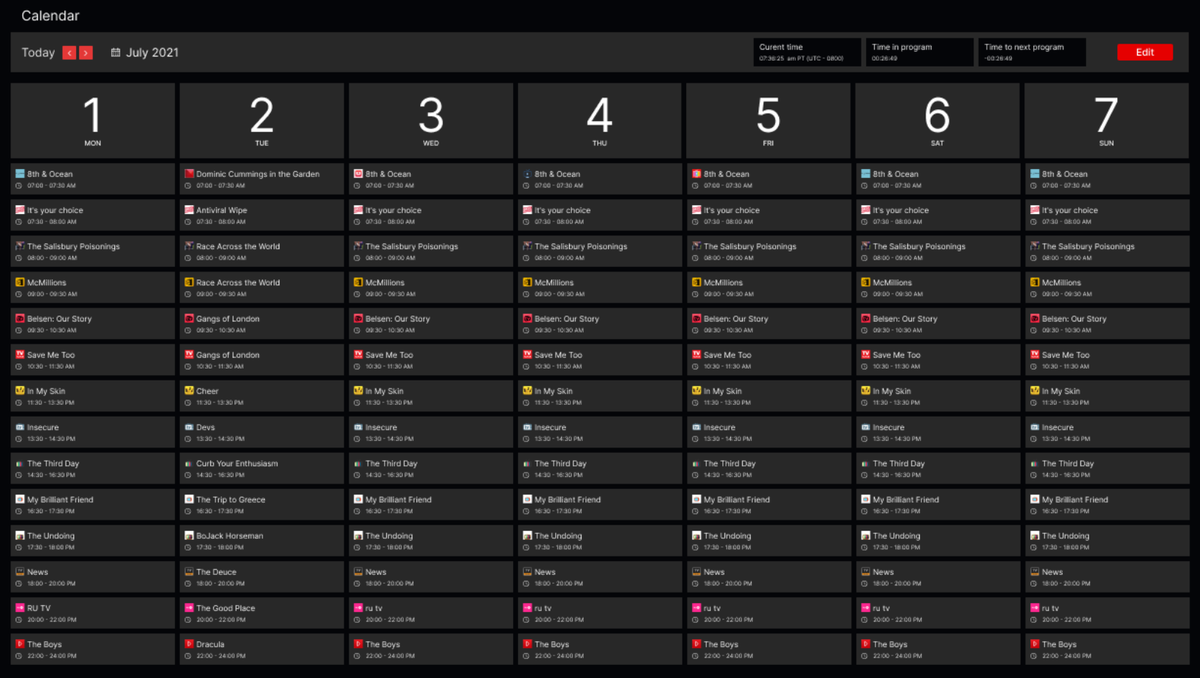
How does a schedule work?

1 **Select Your Channel**
If you have more than one channel, select the channel from the dropdown menu found in the top right corner of the calendar view.

2 **Edit Schedule**
When you are ready to begin editing your schedule, click the Edit Schedule button at the top of the calendar to enter into Edit mode.

3 **Add Programs**
Once in Edit mode, click the Add Program button to add programs at specific start times, or simply double click into the desired time on the schedule.

4 **Move / Delete Programs**
To change the placement of scheduled programs, simply drag and drop the selected program(s) to the new position in the schedule while in Edit Mode. Alternatively, you can use standard Copy / Paste keyboard shortcuts to quickly edit by selecting the items you wish to copy and clicking on the schedule where you wish to place them.

Also about Schedule


Planning and managing is easier than ever In traditional management model, broadcaster utilizes extensive human resources for content, license, metadata as well as playlist, self-promotion, commercial planning and workflow while also coordinating daily ongoing operations. In this program all of those activities have been automated and simplified to maximum. Thanks to that, generation of daily playlists for two channels can easily be managed by one person, which significantly decreases the overall costs of operation while increasing the productivity. There's no better way of keeping everything in check and optimizing human resources, than relying on just one tool.
